

Job Offer: Web Plugin Developer Internship

The Center for Advanced Imaging (CAi, <https://cai.hhu.de>) is seeking a student to join our team and contribute to the development of web plugins for the renowned data management platform, OMERO (<https://www.openmicroscopy.org/omero/>). As an established open-source project utilized by researchers worldwide, OMERO plays a pivotal role in managing image data in research institutions.

Responsibilities:

- Develop Django-based web plugins to enhance OMERO's functionalities.
- Ensure all contributions are open source, fostering a collaborative development environment.

Requirements:

- Strong coding/computer skills.
- Interest in research in biology.

Technological Skills:

- Python
- JavaScript, HTML, CSS
- SQL
- Git (Github)
- Linux / bash

Other Skills:

- Ability to work autonomously.
- Collaborative mindset for engaging with the online developer community.
- Proficiency in English.

Compensation:

- 13€ (SHK) / 14€ (WHB) / 16.5€ (WHK) per hour.
- 10 hours per week.
- Initial contract period of 3 months.

Join us at CAi to make meaningful contributions to OMERO's development while gaining valuable experience in the intersection of technology and biology.

Apply now by sending your CV to Tom Boissonnet (tom.boissonnet@hhu.de).
